		Fax	

Summary

Less than 100 words

Total amount requested in this competition $ 500.00

Aimed at grade 11 students in Ontario and Secondary V students in Québec, the Math Horizons Day is an activity to promote the study of mathematics and extoll the benefits of a career requiring a solid knowledge of mathematics.

Each school in the region (Eastern Ontario and Western Quebec) is invited to participate with a team of four students together with their math teacher. We usually receive about 30 schools every year (about 150 people), which is the maximum number we can accommodate here on campus.

Applicants

Put any specific information on the relevant experience or expertise of an applicant in "Other".

Name(s)	Joseph Khoury		
E-mail	jkhoury@uottawa.ca		
Position	Instructor-Director of the Math Help Center		
Employer	University of Ottawa		
Address	STEM Complex, 150 Louis-Pasteur pvt		
	Ottawa, On		
	K1N6N5		
CMS Member #	009329

What you propose to do

at most 40 lines

The day starts with a talk by one of the professors of the department about his or her work in mathematical research and the impact of new discoveries on modern technology, medicine, economy and other aspects of life. The presentation is sometimes given by a mathematician who works in industry or in governmental agencies. Before the lunch break, a presentation of different careers where a solid knowledge of mathematics is required is usually given by the chair of the department.

After lunch, the teams compete in mathematical contests. The contests include questions in various areas of mathematics as well as relays. The day ends with some individual contests as well. The winning teams and individuals leave with prizes and certificates in recognition of their achievements.
